

Report (195/200)

- Different options for each component (UI/frontend, logic/backend, database) were listed and a comparison of the pros and cons were made for each of them.
- A summary is missing for the final decision.
- Would be nicer if some references were added when making certain claims.

Deployed Application (500/600)

1 - The application is functional (170/200)

- Basic functionality is working fine (e.g. adding items, summing the total amount, and applying tax).
- Local database is implemented on Android.

2 - The application's UI is present and usable (160/200)

- A simple UI is built and the UI is cohesive and clear.

3 - Testing infrastructure implemented (170/200)

- A basic testing infrastructure is implemented.
- Included brief description of possible extension.

Testing Availability (180/200)

1 - The application is deployed (80/100)

- A demo video is provided.
- CD is implemented.

2 - Instructions for testing are provided (100 /100)

- Instructions are provided for running app locally.
- A demo video is provided.

Total: $195/200 * 20\% + 500/600 * 60\% + 180/200 * 20\% = 87.5\%$
